

BRIDGE BANK

TECHNOLOGY BANKING

Services for Technology Companies Include:

Working Capital Lines of Credit

This flexible revolving line of credit may be utilized to support increasing assets in a growing company. Lines may be formula-based or non-formula-based depending upon your needs, and may help conserve cash and improve relationships with suppliers.

Equipment Financing

Bridge Bank provides term loans to finance purchase of equipment, acquisition of product lines or business operations, tenant or leasehold improvements, permanent additions to working capital, and to refinance existing debt.

Bridge Loans

Bridge Loans provide short-term working capital that will bridge a company to a well defined liquidity/equity event.

Growth Capital

Allows companies to leverage their equity capital while adding “runway,” thereby providing the dual benefit of reduced dilution and the potential to achieve greater step-ups in valuation between equity rounds.

Corporate Credit Cards

A line of credit can be established for the purpose of issuing individual corporate credit cards. This allows for effective control of corporate purchases, travel and entertainment expenses and provides management complete flexibility in issuing and canceling cards as needed.

To complement these services we provide a full range of state-of-the-art deposit and investment products and services.
